DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

The town dates largely from the late nineteenth century, with a few earlier buildings. There are three church structures; the Episcopal Church (now a commercial building) is a frame structure with round-headed double hung sash windows and a semi-octagonal apse. St. Mary's Catholic Church, on the site of earlier churches, is a brick building of Gothic Revival design with a corner tower and central entrance porch. The Baptist Church is a frame structure sheathed in tongue-and-groove siding. At the roof ridge is a bell cote with louvered openings. The facade has double central doors and windows at the gallery level.

Most of the houses are frame, sitting on stone foundations and having internal brick chimneys. Most also have bracketed cornices. The [] house is one story, sitting on a high brick foundation. It has external, brick end chimneys with steeply-sloped weatherings and free-standing brick stacks. The store and post office is a two-part building the commercial wing being a two bay block with a false pediment attached to a three bay house. The Sellman house has a double end chimney on the west end; the front stack is two stories and the rear stack, one story. The Dr. Stonestreet house is the one brick house in the town. It is of Italianate character, with a hipped-roof and center chimney, segmentally-arched window and door heads with keystones in brick, and a porch with elaborately bracketed posts. A Queen Anne house has large, heavily articulated chimney, a projecting staircase bay, dormers, window bays and a porch running around several sides of the house.

Behind several of the houses are various kinds of out-buildings. One house retains its frame water tower, attached to the kitchen wing. Behind the post office is a log meat house. The rear wings of four of the houses on the north side of Barnesville Road have shed-roofed rear wings that are the oldest parts of the buildings.

Washington, D.C.

M: 12-12
Barnesville Historic District
(Article written by Mathilda Roome DuVall
in April, 1933. Donated by Jack L. Finglass, 1982)

Romance of Montgomery County.

BARNESVILLE.

Even in these days of rigid economy, when every mile of travelling seems to expect questioning as to it's real worth, it is surprisingly easy to find Romance at our door. We have but to turn the nose of the family "flivver" towards the north-west from Washington, after filling the tank with the favorite brand of gas..and at once we are on our quest. The road to Rockville is for a ways, a comparatively new road, but after we reach Rockville, we are travelling over roads that are the same that served those early settlers, who made Montgomery County the alert and independent County that it unquestionably is today. It's name is in itself romantic, being taken from one of the early American H eroes that dashed across the pages of history..one Robert Montgomery a noble and heroic Irishman, born near Raphoe, in Ireland on December 2nd 1736. When he was but a scant eighteen years of age, he received his commission a-s an Officer of the British army, and was sent with General Wolfe to settle the trouble in Canada . When General Wolfe fell in battle, the hot-headed young Irishman took over the entire command and led it on to a successful finish.

M:12-12

M.R.D.
Barnesville.

After this, he returned to London, but only for a couple of years, for he had seen at Rhinebeck on the Hudson, the lovely daughter of Judge Robert R. Livingston. So, we see the young General Robert Montgomery coming back to marry his lady-love and to settle himself at Rhinebeck. For the next several years, he seems to have been busy representing his District in the ^{Colonial} ~~Continental~~ Congress, but when trouble came again to Quebec, he was sent up there, and this time he went in full command. His bravery is unquestioned, but curiously, he died on almost the exact spot as had General Wolfe. The warm Irish heart of him had endeared everyone to him, and it is not surprising that his body was brought back to New York, where several years later, in St Paul's Churchyard on lower Broadway, a monument was erected to the twenty-eight year old General who had accomplished more than many another. Naturally enough his name was heard in every part of the Colonies and what could be more fitting when everything is considered, than that his name should be preferred to any name that savored of royalty, by those independent land-owners who had just succeeded in wresting enough land from Frederick and Prince George's Counties to form their own County and for themselves, out of their own massed holdings. To understand this determination of those early settlers for their own County governing, it is necessary to understand the conditions that prevailed. In the southern part of Prince George's County, the land-owners were of a less aggressive nature, and also their lands were culti

vated by slave labor. They were in a way a reflection of the elegant life they had left behind them in England. In contrast to this, those whose land-grants had been further to the northward, were many of them from Bavaria, and bringing with them the smarting sense of injury done them in the (to them) unfair "settlements" between France and Germany, after one or another war, in which Bavaria seemed always to bear the brunt, it was to be expected that they wanted to be done with anything savoring of royalty or of anything at all but the new country to which they had come...to begin all over again their struggle to live. Some of these nobly born Bavarians and Germans, married into the families of those who had come from England...thus we find both sorts of names among those independent ones who even objected to having a Judge over them who was not of their own choosing. The young Irish General had been the expression of themselves without his even knowing of their existence, but he--and they--had ridden over every obstacle until he--and they, too--had found Victory.

At the first, those Maryland men had cultivated tobacco, no doubt because it was equivalent to coin of the realm in the payment of taxes and debts...but while other parts of the State paid scant attention to the demands of this crop on the soil, these wide-awake Montgomery County men set themselves to work in earnest to study into this poverty of soil. It took several seasons to decide what crops to raise in the place of tobacco, but in the end, they decided to raise grain...~~and~~ They did not stop with the raising of wheat, they built a mill and went into the manufac

ture of ship's biscuits which were consigned to the Shipping Agents at Bladensburg, Elkridge Landing and Joppa.. where provisions were sold to ships that came to these wharves from across the ocean. Go today, to any of these same "ports" and try to find someone who can show you where any sea-going vessel could wharf! In his-
tories of Maryland, we read that "considerable vessels" went up the Patuxent river as far as Bladensburg, even further, and there is a record that they went as far as the Little Monacasy, but ~~that~~ is no longer possible.. the surface of this part of the World is changed indeed.

The land-owners found that the new crops were even more valuable than they had hoped, as well as being much better for the ~~ground~~ soil than the steady cropping of tobacco. Quite naturally, with wheat the farmers planted corn, barley, and rye. Dairy farms brought a practical showing of money earned, so that nearly every farm became a dairy farm. Today, in driving past these thrifty wide acres, it is not surprising to find that they are *even* today, being run by direct descendants of those original owners, though not all of them are now known under the picturesque names that were then given to the broad acres but the titles still stand on the books in the Courthouse. "Girl's Portion." "Clean Drinking." "Maiden's Fancy".. down to "Errors Corrected" which was the property of Nicholas Ridgely Warfield, in 1792, but which farm is now the home of Gassaway W. Linthicum. Through this last farm runs the road to Barnesville, from Neelsville. One is certain to be tempted to take the road to Barnesville for it is a most interesting old village with its yearly

Festival at St Mary's Church, that offers the unfailing attraction of a real Tourna-ment, with it's dance in the summer evening, after the "crowning of the Queen of Love and Beauty."

One reaches Barnesville, coming from Washington, by the road used by the street cars in Rockville. Following this same road for some miles, Beallsville is reached and there a sign on the Right of the roadside, bears the name BARNESVILLE. Turning into this road, and following it's winding ways, we come into the ~~village~~ century-old village quite suddenly...face to face with the one village store with it's proper porch, on which like as not, there are men and boys sitting in the sun while friendly dogs snatch a na-p the while their masters discuss the latest news that has arrived over the underground route.

There is but one way to turn..to the west. The three or four houses to the east, are more or less modern, and we do not see anything of the famous old Barnesville Academy that for so many years made much history for Maryland by "educating Young Ladies" to quite a high point of excellence so that they were fully able to bear themselves with great credit to the Barnesville Academy. So we turn to the west and catch our first wide view of dignified old Sugar-loaf Mountain..the advance Agent of the Blue Ridge Family, - but it's dignity is too great for persiflage.

The houses on either side of the rather wide single street are uneven in every way, like uneven teeth that mock at beauty, but which nevertheless have character of their own. They are vaguely familiar, too, altho resisting every

M:12-12

effort of memories to identify their proper place in some vague Book... Ah,--it comes now,--the Deserted Village..Yes ,the last time that old book was seen lying face down,wide open,too...in the old attic! But this is no deserted village,far from it,for voices come from behind carefully curtained windows,from behind tall ferns that have been carefully trained against wide windows.. It is not the hour for the arrival of the mail,evidently.

The street slopes down at a surprising ~~rate~~ degree and at the one side,stones stand rather high above the ground,reminding of ^{one} stepping stones in an old English village. On the other side of the street the ground slopes upward,so that naturally enough in heavy storms the water would ~~naturally enough~~ collect on the lower side of the way. Almost half-way through the village stands St . Mary's Church,with rather spacious grounds about it,and to one side a surprisingly new parish house makes the church itself seem older than it may be...~~naturally~~ one decides that the church must be interesting--and old. Vain thought! The inside is bleak...almost bare. Chilled one comes back to the brilliance of the out-of-doors and Sugarloaf,with it's dignity and--it's severity! That, is the reason for the bleakness of the little church! Of course,after a century of the meagreness of just that bareness of life,any group of people would in a way become tinged with a prevailing severity.

Down a bit further on this same street was until not so very long since,an old Methodist Church. Maybe it was ~~pull~~ pulled down,and maybe it--fell down. The old grave

Re: Barnesville, Montgomery
County

Dear Mark:

We have been cleaning out some old files at home and I came across this article written by Ms. Mathilda Roome DuVall, an old friend of my grandmother, Maryland artist and historian. I hope you can share it with Ron and Orlando and then keep it in safekeeping in your files.

Regards to Ellen.

Sincerely yours,

Jack L. Finglass

Dear Jack:

Thank you very much for your short letter of December 28, 1982, enclosing the 1933 article written by Mathilda Roome DuVall about Barnesville. I found it a most interesting account of the town, and you can be rest assured that the original has been placed safely in our survey vertical files.

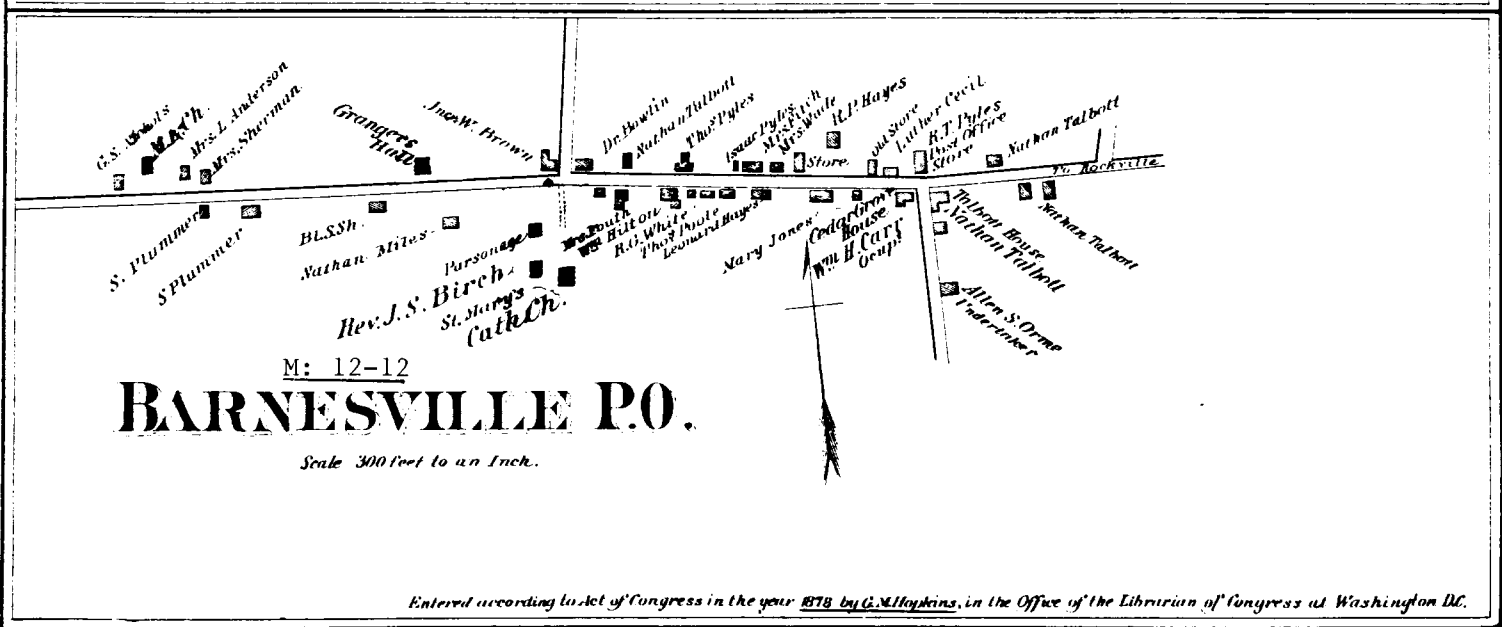

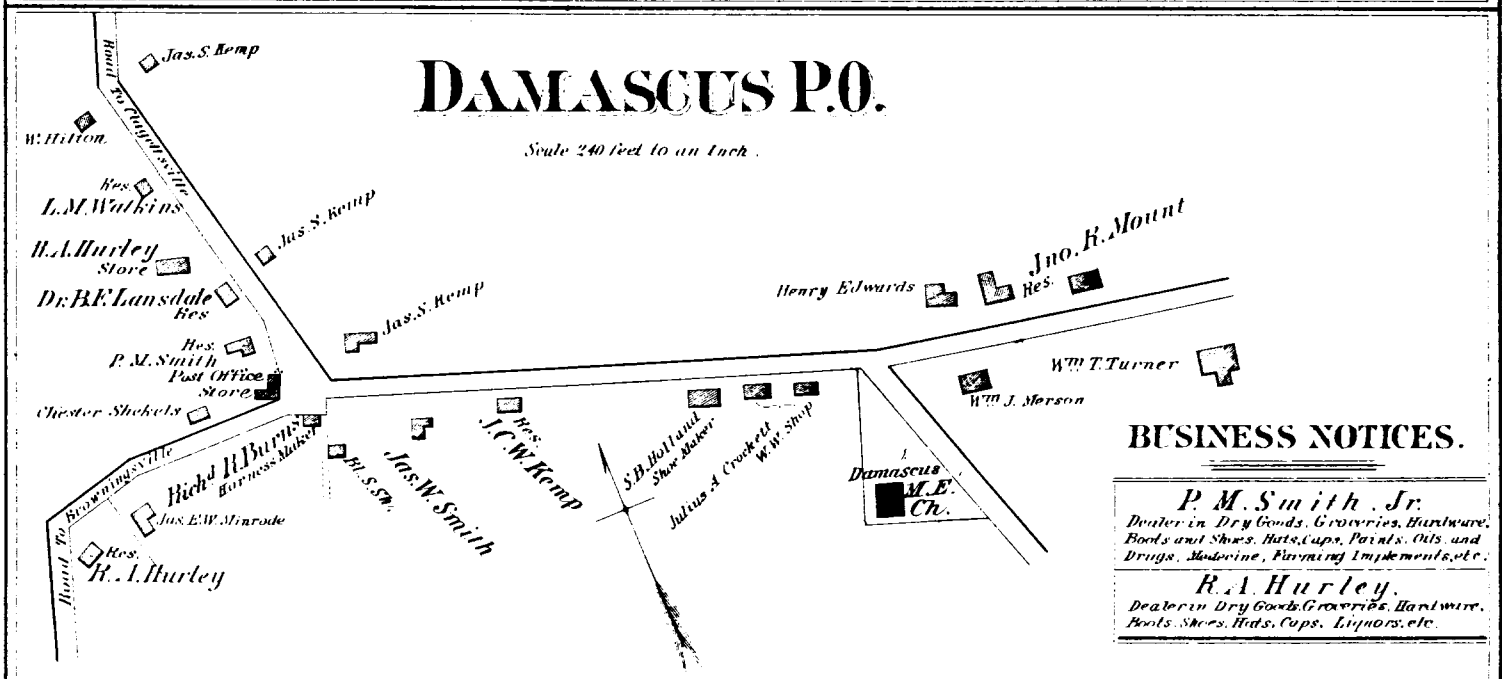

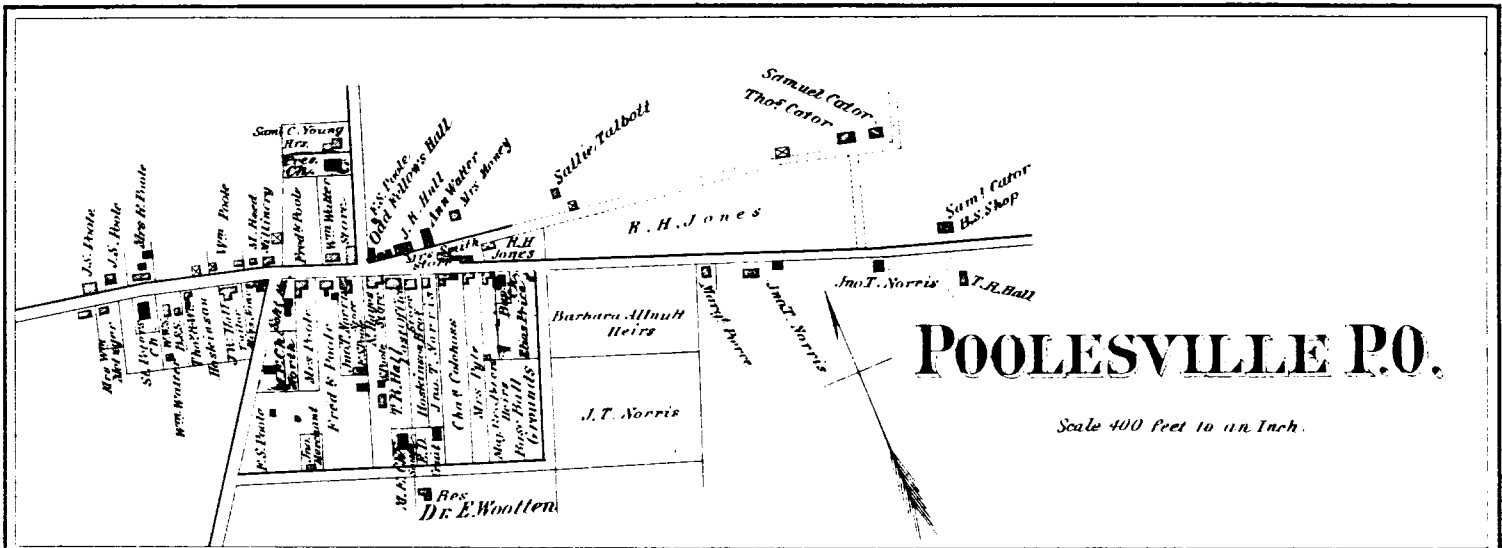

Thank you again for your generosity in donating this account to the Trust's archives.

Sincerely,

Mark R. Edwards

9. Description

This red brick, three bay by five bay, one and a half story structure was designed and built by Lawrence Hilton. There is a three story bell tower on the north (front) of the church. Receding from the tower and set into a Romanesque arched doorway is the main door. There is a round window above this door and above the round window three lancet windows. Along the east and west elevations there are lancet windows and five corbelled brick buttresses.
10. Significance

The Victorian Gothic St. Mary's Catholic Church, built in 1901 by William T. Hilton, is a further example of his craftsmanship, as well as an important Catholic Shrine. St. Mary's was chosen to be the site of the Shrine of Our Lady of Fatima within the Washington archdiocese in 1958. This recognition was part of a worldwide project to establish such a shrine in every archdiocese.

The present St. Mary's Catholic Church is believed to be the third Catholic Church to occupy this site since the mid-18th century. The second church, built in the early 19th century, was a frame structure, and in 1850 a sacristy was added. This building served the Catholic community until 1900, when it was completely destroyed by fire.

The architect for the present brick church was Henry L. Simpson of Washington and William T. Hilton & Sons were the contractors and builders. The dedication ceremonies were attended by 1,000 people.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This red-brick Victorian Gothic church was constructed at the west end of Barnesville and faces north on Barnesville Road.

This is a three bay by five bay one and a half story structure with a gable roof covered by slate tiles. At the northeast corner of the north (front) elevation is a projecting square bell tower. On each of the three sides of the ground level of the bell tower is a single lancet stained glass window. Above, at the second level, on each of the three sides, is a narrow rectangular window. At the third level there are triple lancet windows with louvers on each of the three sides. The bell tower has a pyramidal roof surmounted by a cross. Receding from the bell tower is the main entry: A Romanesque arched doorway framing two wooden paneled doors hung by strap hinges. Above the doorway is a round window. Above the round window are three lancet windows with louvered openings. Recessed behind the entry way at the northwest corner is the third plane of the north elevation. There is a lancet stained glass window at this corner.

Along the east and west (side) elevations the walls are supported by five corbelled brick buttresses. On the east elevation there is an exterior stove flue chimney. The south (rear) elevation has no windows. There is only a marble cornerstone which reads: A.D. 1900.

Within the church itself, there is a balcony which extends approximately one-quarter the distance of the church from the north (front) elevation. The altar area (south) is raised one step above the nave. Flanking the altar area are statue alcoves. Long wooden pews provide seating within.

BUILDER/ARCHITECT Henry L. Simpson, Architect
Wm. T. Hilton & Sons, Builders

STATEMENT OF SIGNIFICANCE

The present St. Mary's Catholic Church is believed to be the third Catholic church to occupy this site since the mid-18th century. The second church, built in the early 19th century, was a frame structure, about 30 feet wide by 45 feet in length. Around the year 1850 an annex was added, in the way of a sacristy. This building served the Catholic community in and around Barnesville for nearly a century until July 15, 1900, when the entire building and its contents were consumed by fire. The county newspaper reported that the fire, when discovered

...had gained such headway that it was found useless to attempt to fight it, and the citizens turned their attention to the adjoining buildings, which were saved after a hard fight.

When the back part of the church fell in, Miss Mamie McDonald, sister of the priest [Rev. Gilbert H. McDonald] ran into the church and up into the gallery and rang the bell, escaping with a slight burning of the hands, though compelled to stuff a handkerchief in her mouth to prevent smothering.

The structure was an old one, and to replace it a brick one had been under contemplation for six months. The building was partially insured. The loss is estimated at \$2,000. [1]

The cornerstone of the new St. Mary's (the present building) was laid on October 21, 1900, and the church was completed by August of 1901. The architect was Henry L. Simpson, of Washington, and William T. Hilton and Sons, of Barnesville, were the contractors and builders. The dedicatory ceremonies, held on August 19, 1901, were attended by upward of 1,000 people. A contemporary account described the new edifice as

...built entirely of brick, is 38 feet in width, and 68 feet in length on the square outside the tower, which is 12 feet square and 77 feet high. At the western corner of the church is a sacristy, which

measures 16 x 14 feet, and at the doorway at the southern or western side of the church is a large basement, where will be installed in the near future a furnace and steam heating apparatus,

As for the interior of the church,

...the trimmings are of cypress, The pews are of oak, The windows are all memorial and number five on each side and three in the tower...The handsome statues, to the right and left of the altar in the two alcoves built back into the wall, are the present of Rev. M.J. Riordan, pastor of the church for many years...The chancel rail was a gift of St. Patrick's Church of Washinton, [2]

The Shrine of Our Lady of Fatima, in front of the church, was dedicated in 1958 as part of a world-wide project to establish such a shrine in every archdiocese, St. Mary's was chosen to be the site of the shrine within the Washington Archdiocese,

9. Description

This three bay by three bay, two and a half story frame house is the most modern of the houses built by Mr. Hilton. A shed roofed porch wraps around the north (front) and west elevations. It is supported by seven paned columns on ashlar, "Blue Stone" bases quarried in Frederick. There are one over one double hung windows. The gable roof has slate fish scale design shingles. The house has recently been covered by white aluminum siding. The interior is notable for the wood working done using chestnut.
10. Significance

This three-story frame house is the final and most elaborate example of carpenter William T. Hilton's craftsmanship. Thomas O. White had Hilton build this house in 1904, then lived in the house until the 1930's. Since his death, about 1938, the house has changed hands twice.

The house is situated on the site of the Talbott Hotel, constructed about 1876 and described as a "building (which) would be a credit to a village or town of far greater pretensions than Barnesville". The hotel was destroyed by fire in 1894, and on the death of Nathan Talbott in 1902, the property was offered up at public auction as having a "fine well of water, small stable and carriage house, and foundation for large building". These three outbuildings -- a garage, barn and well house -- still remain.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

On the southeast corner of Barnesville's main street and Route 109 stands a large, three story frame house which is the latest and most elaborate example of Mr. Hilton's work.

The house is basically square with large two story, three-sided bay windows on the north (front) and west elevations. A wooden porch wraps around the north and part of the west elevations. The shed roof has recently been repaired, but its denticulated cornice line remains. The porch is supported by seven posts of ashlar block "Blue Stone" quarried in Frederick. Wooden steps leading to the porch from the north and west are set into stone piers. The house has a gable roof which is covered by slate set in a fish scale design. Two dormer windows project out from the roof and are also decorated by fish scale slate shingles. A rear (south) two story wooden porch has lath turned wooden railings and is supported by brick foundation pilings.

The first floor of the north (front) elevation has a bay window at the northeast corner and a Victorian Palladian window at the northwest corner. The bay window is a full two stories high; above the second story on the original clapboarding are shadows of decorative colonial swags. Aside from that one portion of the house has been entirely encased in modern aluminum siding. On the west elevation, at the third story, is a small rectangular inset porch with a door. The original flanking columns have been removed because of rot.

The house has a remarkable and unusual interior. Entering from the north into the entry hall, the music room is to the left (east), the living and dining rooms are to the north and southwest, respectively; a dog leg staircase is to the southeast; the kitchen extends across the south of the house; a formal alcove and fireplace are directly opposite the front door. The alcove is the most striking feature of the entry hall; the rich warm tones of the carved natural chestnut are repeated throughout the first floor. The alcove is defined by flanking valuted columns; short built-in benches connect the columns with the walls flanking the white marble fireplace with its simple white painted wooden mantle. A beveled glass mirror surmounts the fireplace. The living room is also entered through flanking natural chestnut valuted columns. This room has a fireplace identical to that in the alcove, absent the mirror. The music and dining rooms have paneled natural chestnut doors which slide into the walls. The staircase has a square carved chestnut newell post and balusters. Egg and dart molding encircles the entry way. The kitchen has been entirely modernized.

There are three remaining outbuildings -- a garage (now covered with aluminum siding), a barn (with doors changed and interior gutted), and well house (unaltered).

Local History

SPECIFIC DATES 1904

BUILDER/ARCHITECT Wm. T. Hilton & Sons

STATEMENT OF SIGNIFICANCE

This house is situated on the site of the Talbott Hotel, constructed around the year 1876. The "Talbott House", as it was known, was described as "a building (which) would be a credit to a village or town of far greater pretensions than Barnesville, whether considered for its effect on the eye, or in the material, workmanship and money expended in its construction".¹ John Hilton, the father of carpenter William T. Hilton, was the saloonkeeper at the old hotel, and his paupered sister lived in an old log cabin on the now vacant lot across the street.²

However, the hotel was entirely destroyed by fire on March 28, 1894, uninsured and entailing a loss of about \$10,000, and was apparently never rebuilt.³

Upon the death of Nathan Talbott, in 1902, the property was offered up at public auction. The advertisement for the sale, held on February 28, 1903, described the property as that parcel,

...known as the Hotel lot, containing 2½ acres of land situate in the town of Barnesville, at the junction of the road from Poolesville, and is improved by a fine well of water, small stable and carriage house, foundation for large building. This is on the best corner in town, and is suitable for store or hotel.⁴

At the sale, the lot was purchased by Thomas O. White, for the sum of \$520.00. A formal deed for the property was executed on April 2, 1904.⁵

Thomas O. White contracted William T. Hilton and sons, Barnesville-based carpenters, to erect a new house upon the property. Work was in progress by the summer of 1904, and the house was completed by the end of that year.⁶

Late in his life, sometime in the 1930's, Thomas O. White moved to Howard County, Maryland, where he resided at the time of his death. His heirs, Mary W. Lankford and Laura White, sold the property on August 22, 1938, to James Spencer and Frances T. Fisher, his wife.⁷ The present owners, Paul and Gertrude Meissner, purchased the house and lot from Frances T. Fisher, widow, on October 20, 1964 (James Fisher having died on December 4, 1960).

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This five bay by two bay, two and a half story, log and frame house sits close to Barnesville Road facing south.

Built on fieldstone foundations reinforced by poured concrete, the original south (front) section was a two story, two room log house. This was expanded to the north, by a two story, two room frame addition and sometime later, an ell addition at the northwest corner. The log and frame sections were covered by wooden siding and later stucco.

A poured concrete slab porch extends across the entire south (front) elevation. On the north (rear) elevation there is a shed roofed porch supported by four wooden columns. The porch has a decorative railing. The south (front) door is wooden paneled and is flanked by three light sidelights. Two groups of four square posts support a molded lintel above the doorway. The north door is glass and wooden paneled. Generally, there are two-over-two double hung windows throughout the house. There is a Palladian window at the cross gable on the south elevation; two four light windows flank a single six light window. On the east elevation at the northeast corner there is a pair of six-over-six double hung windows. At the east and west gable ends there are two small louvered ventilator windows.

There are two exterior stuccoed chimneys on the west elevation. The cross gable roof has corrugated metal covering.

The house has north-south central hallway and is flanked on the east and west by two rooms. A single run, open-string staircase ascends from south to north along the east interior wall. The one story kitchen ell extends from the northwest corner. The stairway has a molded newel post and thin square wooden balusters. The string is wooden paneled. The first story floors are narrow, but the second story hall floors are random width. Doors are wooden paneled and set into simple molded surrounds. The walls are plaster over lath.

SPECIFIC DATES

Before 1832

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

Jeremiah Hays was the founder of Barnesville, located on "Jeremiah's Park", as surveyed in 1747 and later resurveyed. A tax list for the year 1783 shows it was then "184 acres, but indifferent land", 35 miles from Georgetown, but already contained 3 small log houses and a barn.

The town grew quickly and was mapped by authorization of the Maryland Assembly in 1812, showing 25 lots and three streets.¹

This house was probably part of the property left to Abraham S. Hays in 1822 by his father Leonard.² The Hays family was numerous and influential throughout the life of the town, various members serving as magistrates, commissioners, mayor, schoolmaster, storekeeper, postmaster, doctors, and farmers. Abraham Hays sold 61 perches of land (part of lot #10) with a welling on it, 10 years later to Jacob Nicholls for \$225.³ This was the original of the present house, proving it dates from before 1832.

Jacob Nicholls lived in this house until his death in 1869, when the property was passed along to his daughter Harriet A. Wade.⁴ Harriet Wade sold the house to Mary E. White in 1883,⁵ and it remained in the White family for 40 years.

Joseph N. White sold the property to Arthur C. Hersberger in 1923; that family owned the land for more than 50 years.⁵ The present owners purchased the house in 1976.

The north (front) porch has a shed roof supported by four square posts and enclosed by a balustraded railing. Generally there are six-over-six double-hung windows, although on the north elevation, east of the front door, there is a large beveled glass window surrounded by 28 smaller panes of glass. There are two shed-roofed dormers on the south elevation. The house has a gable roof with asbestos shingles on the north elevation, and corrugated metal on the south elevation.
10. Significance : This house is traditionally thought to be one of the oldest in Barnesville, a town originally platted in 1812. The Hays family owned property in the new town from its beginnings, and this house was probably in the inheritance Leonard Hays received from his father, also named Leonard Hays, in 1822. When the younger Hays died in 1864, his will stipulated that his daughter Ellen Hays Poole would receive two houses in Barnesville including this one. The Poole heirs sold the property to Clagett C. Hilton in 1929. Clagett Hilton was the son of William T. Hilton, local carpenter who built many of the buildings in the surrounding area. Hilton operated an undertaking business from this house. When he died in 1933, his children William B. and Constance C. Hilton retained the house until 1964, when they sold the property to Edwin R. Johnson.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This three bay by two bay, one and a half story, log and frame house sits close to Barnesville Road facing north.

Built on fieldstone foundations, this log and frame house is now covered by gray clapboarding. The north (front) porch extends across the entire elevation. It has a shed roof supported by four square posts and square balustrade along the north side of the porch. On the south elevation a modern sunporch has been erected. The north (front) door is constructed of a beveled glass panel and wooden panels. Generally, there are six-over-six double hung windows throughout the house. On the north elevation, east of the front door is a large beveled glass window surrounded by twenty-light small square panes of glass. West of the north (front) door is a smaller beveled glass window surrounded by twelve small square panes of glass. On the south elevation there is a grouping of three six-over-six double hung windows. Also on the south elevation there are two shed roof dormers with two light casement windows. At the east and west gable ends there are two small square windows flanking the exterior end chimneys. There is an exterior stove chimney on the east elevation at the southeast corner.

The house has a gable roof with asbestos shingles on the north elevation and corrugated metal covering on the south elevation. On the south elevation there is a one-story lean-to addition with a shed roof.

STATEMENT OF SIGNIFICANCE

This house is traditionally thought to be one of the oldest in Barnesville, a town originally platted in 1812¹ and which became a service center for the surrounding countryside.

The Hays family owned property in the new town from its beginnings, and this house was probably in the inheritance Leonard Hays received from his father, also named Leonard Hays, in 1822.² Unfortunately the will is not specific as to lots and structures thereon. When the younger Leonard Hays died in 1864, his will stipulated that his daughter, **Ellen Hays Poole** would receive two houses in the town of Barnesville, including this one "adjoining that where I now reside".³ Ellen Hays Poole died intestate, leaving as her heirs her children, Leonard Hays Poole, Sally Poole Bevan, and Algernon Poole.

The Poole heirs conveyed the property to Clagett C. Hilton in 1929.⁴ Hilton operated an undertaking business from this house, and died in 1933. His children William B. and Constance C. Hilton retained the house and 16,000 square feet of land.

The Hiltons sold the property to Edwin R. and Pauline S. Johnson in 1964.⁵ The Johnsons conveyed the plot to their son and his wife, the current owners, in 1974.

9. Description

Located on the west side of Beallsville Road, the Hilton Shop was formerly Christ Chapel. This one bay by five bay, one and a half story frame building has grey novelty siding. A small entry with a gable roof is on the east (front) elevation. There are paired paneled wooden doors leading into the shop. The round-headed design of the doors is repeated by the round-headed double hung windows with their black wooden louvered shutters. The west elevation has a simple apse or bay window with triple lancet windows.
10. Significance: Christ Episcopal Church in Barnesville is significant for serving religious needs of the community for almost 70 years before being adaptively reused as a cabinetmaker's workshop. It is a fine example of the vernacular building craft of William T. Hilton of Barnesville.

Having travelled to Monocacy Chapel in Beallsville until the Civil War, then to St. Peter's Episcopal Church in Poolesville, Barnesville's Protestant Episcopalians demanded a "chapel of ease". Land was donated by Mrs. Eliza Hays and her daughter, Mary M. Hays, and William T. Hilton and Sons were contracted to perform the work. The Bishop of the Washington Diocese officiated at the dedication.

The Church served the parish until World War II when the vestry of St. Peters sold the chapel and surrounding 1½ acre lot to William B. Hilton, grandson of the builder. Since 1944 the church has been used as a workshop and storage shed. The signboard over the entrance "William T. Hilton and Sons - carpenters and undertakers" formerly hung on William T. Hilton's woodworking mill nearby, and was placed here when the old mill was demolished.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Located on the west side of Barnesville Road is the Hilton Shop, formerly Christ Chapel. This frame one and a half story structure has one bay at its gable end (east) facing the street and is five bays deep on the north and south (side) elevations. The front (east) entry way duplicates in smaller dimensions the shape of the roof. The front doorways is round arched and there are paired paneled front doors which lead inside. All the windows on the north and south elevations repeat the round arch motif and have wooden louvered shutters which extend the full length of the window. The west (rear) elevation has a simple three faceted bay window, an apse, with triple lancet windows; the two flanking windows have stained glass. The exteriors are covered by novelty clapboarding.

The interior has been much altered to accommodate the needs of the Hilton Shop. However, at the west end the remains of the wooden columns and elliptical archway -- with a wooden lattice -- work screen are still visible.

The stained-glass memorial windows were contributed by the Hays and Bile families.

1876

BUILDER/ARCHITECT

Wm. T. Hilton & Sons

STATEMENT OF SIGNIFICANCE

Christ Church was constructed in the latter half of the 19th century to serve the needs of the Protestant Episcopalians living in and around the town of Barnesville. Prior to the chapel's existence, people in this section of the county had to travel some distance to practice their chosen denomination. They attended Monocacy Chapel at Beallsville, which was not too great a distance, but during the Civil War the Chapel was desecrated; the resulting transfer to St. Peter's at Poolesville was inconvenient, and soon after the war there was a demand for a nearby "chapel of ease". Consequently, on August 31, 1872, Mrs. Eliza Hays and her daughter Mary M. Hays granted, for the minimal consideration of one cent, to Frederick S. Poole, William W. Poole and Richard Poole Hays, in their capacity as "the vestry of the Protestant Episcopal Church of Barnesville", a 1¼ acre lot near the village of Barnesville, for the purpose of building a church house thereon.¹ William T. Hilton and sons, local carpenters, were contracted to perform the work. Construction was begun early in 1876, as evidenced by a letter from Barnesville, dated April 25, 1876, appearing in the Montgomery County Sentinel, in which the building is referred to as "the Episcopal Church (yet unfinished)".² However, the church was not officially consecrated until December 19, 1878. The dedicatory service, as reported by the county newspaper, was well attended, with the Rev. Bishop Pinkney, Bishop of the Washington Diocese, officiating in the exercises. The new church was described as "a substantial frame building, of a pretty style and tasteful trimming, and will seat comfortably about two hundred persons".³

Christ Episcopal Church was served by the pastors of the parish church, St. Peter's Church of Poolesville, until World War II. By that time its condition had greatly deteriorated and its congregation was much reduced. Accordingly, on May 19, 1944, the wardens and vestry of St. Peter's Parish sold the chapel and the surrounding 1¼ acres to William B. Hilton, grandson of the builder.⁴ Since that time, for the past 30 years, the church has been used as a cabinetmakers workshop and storage shed by the Hilton family. The signboard over the entrance reading "William Hilton and Sons-Carpenters and Undertakers" formerly hung on Wm. T. Hilton's woodworking mill nearby, and was placed here when the old mill was demolished.
